"Sèn Vile": get the party started!

You can find the brochure that details the program of the "Sègra di Sèn Vile" at the Tourist Offices. We remind you about the free-of-charge shuttle service from Canazei to Moena (8-9-10 pm) and from Moena to Canazei (12-1 am), stopping at every village.

Today begins the festival dedicated to the saint patron of Moena, San Vigilio. The celebrations start at early morning - from 8.30 am - with the waking up of the city. Then they continue with the Mass (10.00 am) and the opening of the pavilion Navalge, where you can taste the most flavoursome dishes of the Ladin culture. The music becomes in these days the protagonist of the party: the Municipal Band of Moena plays not only for the opening concert - at 2 pm - but also for the whole period. Thereafter, the performance of the Kartoffelkreiner band (5 pm) and the Okrogli Muzicanti Band (8.30 pm). The festival continues till Sunday with many events, and finishes on 30th June (2.30 pm) with the parade and the exhibition of bands and traditional groups, eight on the whole.

Easy walks

Looking for the upper part of Soraga

Set off for this easy walk from the playground at Soraga, crossing then the gangway and turning left along the Avisio River. Ascend a ramp and take the forest road that descends from the Upper part of Soraga. Walk the flat path towards the Hotel La Molinella and thence ascend upwards. Go beyond a gate and go straight on. At a crossroads turn right and follow the indications for "Percorso Natura". The ascent becomes steeper but suddenly fades away, turning into a flat road that descends on the right on an easy path among the meadows of the Upper Soraga. You will find the first houses of the hamlet and, following the right, walk on the last part of Street Gherghele. Keep going on the dirt road towards the Avisio River and you will arrive at the gangway you passed at the starting point.

Passepartout

Gardin's "Soaring towards the sky"

Laughing and thinking about the reality. Lucio Gardin - from Trentino - is not only an actor, but also a dramatist, journalist, TV author and director. This evening he performs at 9 p.m. at "Padiglione Manifestazioni" in Pozza. Gardin puts on the show "Si slancia nel cielo" ("Soaring towards the sky"), characterized by a clever humour, which is never vulgar, that depicts the Italian's (bad) habits, and above all those of the people from Trentino, telling their stories in the city and on the mountains - environment to which he dedicated a footage in 2012. With the title "Una nuova vita" ("A new life") the film (that is supported also by the Accademia della Montagna) aims at making the youngsters aware of environmental, historical, anthropological and cultural values, which are key elements of the mountain life.

Did you know that...

The uniqueness of the Dolomites relies on its mineralogical composition: double calcium and magnesium carbonate. The important discovery in 1791 by Déodat de Dolomieu activated researches on the mountains born between 270 and 230 million years ago from Mar della Tetide. At the time the tectonic action made the seabed arise, water receded and the Dolomia bobbed up. The violent movement of the lithosphere plates created the mountain chains. Sand and limestone joined the other geological layers, but only after the ice age, the water's action shaped the Dolomites.

To participate in the initiatives for guests is compulsory to register at least one day in advance at the Tourist Offices of the Val di Fassa Card (ask your employer accommodation). The activities are reserved for guests of the associated structures all Apt Val di Fassa.
