Did you know that...

Once upon a time, the people of Val di Fassa made the butter at home: during the night, they used to store the milk in a fresh room, so that the milk's cream came to the surface. In this way, it was easier to remove it and process it with the churner. This tool - really important for the processing of butter - has been made in two shapes: until the 17th century it was a vertical piston, then it rotated horizontally. After the second world war, the home butter processing finished, but some families still keep the gears of grandfather and great-grandfather (often decorated by paintings and engraving).

To participate in the initiatives for guests is compulsory to register at least one day in advance at the Tourist Offices of the Val di Fassa Card (ask your employer accommodation). The activities are reserved for guests of the associated structures all'Apt Val di Fassa.
