

In case of bad weather, Stockhausen and Bouman's concert (see picture) will take place at 5.30 p.m. by the theatre Navalge.

HIGHLIGHTS

STOCKHAUSEN AND BOUMAN: A DIALOGUE BETWEEN MELODY AND NATURE

Among the best choices for "The Sounds of the Dolomites" - thanks to their ability of getting in contact with the place where they play through the melody - Markus Stockhausen and Tara Bouman, perform today at 1.00 p.m. by the refuge Bergvagabunden Hütte. He, Karl Heinz Stockhausen's son, is an established trumpet player, she plays several clarinets and the basset horn. They share a common vision on the "universal" music, facing several genres, from the classics to jazz. So, the dialogue between the notes and the environment intertwines with the history of the setting, whose peaks bear the scars of the Great War. The location of the concert can be easily reached from Passo San Pellegrino, with the Costabella chairlift, and then on foot along path n. 604, walking for about 50 minutes.

Itineraries

FROM CANAZEI TO GRIES

This easy walk starts from the centre of Canazei. From here, run down the Roma Street and take the Cercenà Street on the left. Few meters after the bridge on the Avisio river, walk leftwards on the higher path that skirts upward the park of the Residence Villa Avisio. Continue beyond the plank that signs the limit of the meadows, keep on walking by the skilift Avisio, and follow its stream for a while. Then, you will cross a little wood and, after a short descent, walk again down by the stream. Walk nearby a wide pasture, thereafter, enter the wood cobbled with a gorgeous moss-covered carpet. Then, come out on the state road near Pènt (=bridge in Ladin) de la Roa. Overpass it and come back to Canazei along Pareda Street.

Did you know that...

Once upon a time, the people of Val di Fassa made the butter at home: during the night, they used to store the milk in a fresh room, so that the milk's cream came to the surface. In this way, it was easier to remove it and process it with the churner. This tool - really important for the processing of butter - has been made in two shapes: until the 17th century it was a vertical piston, then it rotated horizontally. After the second world war, the home butter processing finished, but some families still keep the gears of grandfather and great-grandfather (often decorated by paintings and engravings).
