Since many years the "Canazei Night Show" is a good occasion to present the winter tourist offer of Canazei.

HIGHLIGHTS

ONE-NIGHT WINTER IN CANAZEI

Amazing scenery today in the main square of Canazei. In the throes of August, a soft white mantle will cover the street...it's the Canazei Night Show. The incredible show takes place today at 9 P.M. in Roma Street and Piazz Marconi square. Protagonists on the snow, the local ski school with the teachers but also amazing ski and snowboard freestylers and ski-alp athletes. The unique show includes choreographies but is also an occasion to explain a bit of ski-history with vintage techniques and materials displays. The show ends with an exciting torchlight parade of the ski teachers of the ski school Marmolada that invite everybody to visit the village next winter.

Itineraries

FROM RIFUGIO LA REZILA TO MALGA COLVERE AND FANGO

From Ronchi (over Moena), take the first segment of the cable car to Lusia. Go down and walk towards the refuge La Rezila. From here, ascend until you meet a crossroads and make for path n. 625. Pass by Malga Colvere and proceed on the forest road till the crossroads with path n. 634 (to be ignored). After few steps, at a hairpin turn, leave that street and turn right downward the hollow. You will arrive to a steep slope, and then to the lowest boundary of Ciadinon. Go ahead passing a crossroads, and pass over the stream Rif del Ciadinon. Come down through the wooden slopes, passing by the ancient trenches of the Great War. Now take the forest road which comes from Ronchi and, beyond the stream, ascend to the main road towards Fango (1,40 h; 2 h) and go back to Ronchi along the forest road.

Did you know that...

Amongst the protected areas of Trentino there is also the biotope of Roncon, in the municipality of Vigo di Fassa at 1720 m. This is a small peat bog (spreading for around 1/2 hectare in surface) that lays on a small saddle, in an environmental context which is really striking. A pile of sphagnum - that is peat moss, typical of humid areas - characterizes the peat bog, which hosts rare vegetable organisms. This biotope represents one of the few humid areas in Val di Fassa and it is very important for the local amphibious, as it is a perfect place for breeding.
