The project has been created by the Mountain Academy and realized by the Province of Trento, Trentino Marketing and local tourist boards.

HIGHLIGHTS

THE FASCINATION OF “THE GRAND BIKING ROUTES”

The last April, the Provincial Council of Trento approved the initiative “Grand climbs of Trentino”. 23 of the places where the greatest bike challenges took place in Trentino have been chosen for the project. A huge open air natural gym and, at the same time, an appealing tourist attraction for bike-passionate. Two of the great climbs are located in Val di Fassa; the street from Canazei to Pordoi pass, one of the most popular location of the Giro d’Italia and the ascent to Gardeccia, former leg arrival of the Giro in 2011. In order to mark these new itineraries, brand new billboards (in the pic) have been created to describe the path (beginning and end of the climb and length of the itinerary).

Itineraries

FROM FUCIADE TO CIRELLE PASS AND ALBA

To undertake this thrilling track, drive from Moena to San Pellegrino Pass, park and reach Fuciade Refuge (0,40 h). From here, take the steep path no. 607 that arrives through a taxing gravel slope at Cirelle Pass (at 2.683 m), with an altitude gap of 700 metres. The landscape is extraordinary from this saddle, and you can admire the most beautiful peaks reaching 3000 m: southward the Pale di San Martino, westward the ridge of Cima Uomo, in front of you Cima Ombrettola and Sasso Vernale, beyond which you can recognize the imposing vertical face of Marmolada. Keep going on path no. 607 that descends through broad gravel gullies and, underneath Sasso Vernale, turn left towards Val Contrin and the namesake refuge (2015 m; 6,10 hrs.). From here, walk down to Alba di Canazei on path no. 602 (1 h).

Did you know that...

Paul Preuss (1886-1913), famous Austrian climber, defined 6 principles to go to the mountains: 1) be superior to the difficulties you come across; 2) the standard of difficulty a climber faces while descending must represent the upper limit he faces while ascending; 3) the use of artificial means is justifiable only in case of approaching danger; 4) Pitons must be an emergency reserve; 5) the rope is a facility, not the essential gear to climb; 6) the main principle is the primary security of each climber, based on the correct evaluation of his own ability.

Initiatives reserved to guests with the Val di Fassa Card (ask your hotel/apartment) enrolments required by the previous day at the Tourist Offices. Activities are reserved for guests of the associated structures of Val di Fassa Tourist Board
