*The Banda Comunale di Moena was born in 18544, it is made up of more than fifty people and directed by Annarosa Pederiva.*

## HIGHLIGHT

### THE BEST OF SÈN VILE

Each year, on the 26th of June, Moena, honors the patron of the village: Sèn Vile, thus opening the summer season of the valley. The feast, organized by the Banda Comunale di Moena, began on the 23rd of June and today comes to an end. One of the highlights of the event is the music that entertains the public during the four days, an aspect minutely cured by the organizers. The last day of the feast has a pretty full schedule: at 8.15 am the local folk group will animate the village followed by the holy mass at 10 am, the opening of cuisines at 11.45 and the concert of the Bohmische Königsberger Musikanten. In the afternoon, the event continues with, at 2.30 pm, the Banda di Moena and the ceremony of the "Paolo Chiocchetti" contest at 4.00 pm, ending with the "Aperibanda" at 5.00 pm and various songs with the group "Tirataie".

## Itineraries

### FROM POZZA TO CIANCOAL GRAZING TO MEIDA

Reach the bridge crossing the Avisio River, which links Pozza with Meida and walk along the sidewalk that skirts the state road toward Pera. After 200 metres, leave it, always following now Avisio's flow. Continue until the wooden bridge of Piciocaa. Once you have crossed it, you will arrive in front of a chapel recently restored and a large playground for children. Make your way to the lower path towards Meida, and cross a broad grassy plain in Ciancoal. When you arrive at the asphalt road bearing the same name, the ascent begins. Afterwards turn right to the Street del Piz and enter Meida, where you find the Church of San Nicolò. From here, follow Street de Meida, and you will get back to the starting point.

*The complete schedule of events is available in the tourist offices of the valley.*

## Did you know that...

During a stroll in the wood, it can happen to you to see some trees hit by lightning. What happens when such a powerful energy strikes a plant? Sometimes, trees are clipped from top to base and occasionally, there is a spiral scar all along the trunk. The shock causes the vaporization of the water in the tree and as a result pressure cracks the wood. Not all the trees die, but water conductors finally burn and dry up.
