## Did you know that...

In the ancient times, one of the basic need of the local population was to find a place where they can bring their animals to graze. They were used to climb up to mountain, most of the times reaching the passes around the Sella massive. The passes have never represented a limit; indeed, they were a meeting point. This is also testified by "Pian dei Jiadoi" ("Playground" in Ladin), that was, in the ancient times, a point for the shepherds of Val di Fassa and Val Gardena, representing though, the strong connection between the valleys on the two sides of "Jouf de Ciavazes".
