The "Bambi" association, together with the organization of the "Val di Fassa Bike" are helping Mirko Toller to purchase a suitable car.

HIGHLIGHT

THREE STAGES FOR THE "VAL DI FASSA BIKE"

September 10 at 9.00 am the center of Moena will become starting point of the competition, in a unique atmosphere. For the 10th edition of the "Val di Fassa bike", immediately after the start and before the ascent to Passo San Pellegrino, bikers will have to choose among three different routes: Hard Track of 48 km and 2000 meters of climbing, Easy Track of 38 km and 1600 meters drop and Up Hill of 8 km and 1000 meters of climbing. An interesting challenge around Moena and its neighborhood with well-known taxing ascents. The 10th edition, as the previous ones, is open to e-bikes, offering the possibility to participate to a wider public. The Val di Fassa bike has a gentle heart for Mirko, suffering from SMA: take part to the competition and the luckiest one will win a Fat Bike!

Itineraries

FROM PIAN FRATACES TO COL RODELLA

This amazing hike starts in Canazei. Drive (or walk) towards hotel Lupo Bianco at Pian de Frataces, park your car and leave the street going towards the bridge over Ruf de Antermont stream. Cross it and take path n. 655 that follows Col de Pica forest road. When you reach Ruf de Val stream, go on to the limit of the wood towards the Costa Rossa. Turn right and go up to Pian de Marizanela. You will have to face a steep track to the hollow of Val. Once arrived at a crossroads, go left ascending a wide plain (0,45 h), then cross it and go up entering Val Salei, proceeding towards Passo Sella (not much over Rifugio Valentini; 0,30 h; 1,15 h). From here, go left towards Rifugio Des Alpes (0,45 h; 2,00 hrs): here take the path that in 15 minutes brings to Col Rodella (2.484 m).

The complete schedule of events is available in the tourist offices of the valley.

Did you know that...

In the 19th century, the Dolomites were destination of scientists, alpinists and lots of artists. Edward Theodore Copton (SToke-Newington, London 1849 - Feldafing 1921) was one of the visitors of the Dolomites, climbing more than three hundred times the mountains, and drawing the Dolomites in hundreds of paintings. The paintings of Copton became illustrations of the most important publications about alpinistic discoveries. Her painting technique is realistic (especially concerning peaks) and also romantic, as the unique atmosphere of the Dolomites is finely given by her impressionistic brush strokes.
