Did you know that...

In 1952 were built Fedaia's dam, sinuously shaped and 500 m long, another small dam and the lake at the pass. The new hydroelectric basin built from a dam to the other, was 1700m long, and 550 large, 25 meters deep and could contain 16 millions cubic meters of water. Water submerged all the meadows owned by the inhabitants from Penia and the ruins of the old Refuge at Fedaia Lake as well, that has been demolished before the dam's construction. Luckily the small natural lake has been spared.
