

The tickets for the concert of Ferenc Snétberger and Tony Lakatos are available at the Theatre Navalge from 3.30 p.m. till seats last.

HIGHLIGHT

VIRTUOUS SAX AND GUITAR AT THE "SOUNDS"

Ferenc Snétberger and Tony Lakatos will no doubt present an unforgettable concert at the theatre Navalge in Moena, today at 5.30 p.m at the festival "Sounds of the Dolomites". This tight-knit artistic couple is capable of unique performances: Ferenc Snétberger, after learning to play the guitar from his father, has taken up an articulated path, passing from Brazilian music to Django Reinhardt, Egberto Gismondi and letting himself be influenced by jazz notes and even by J. S. Bach. His music culture and talent are expressed by the curious sound of his guitar. Tony Lakatos is one of the most appreciated saxophonists in the world, inasmuch that he has taken part in hundreds of album recordings.

WATCH OUT FOR THE SQUIRREL LAIR

IN THE WOOD THROUGH ANIMALS AND PLANTS THAT POPULATE IT. MEETING POINT AT CIAMPEDÏE (TOP STATION OF THE CABLE CAR).

Itineraries

IN VAL SAN NICOLÒ ON THE "STRADA DI RUSCI"

This captivating itinerary starts from Pozza: to set off for Val San Nicolò, leave the car at the car park Saùch and ascend along the narrow wood that hides, on the left, the picturesque path "Strada de Rusci", so called because it was built by the Russian prisoners during the first World War. Follow the path, which alternates flat segments to moderate ascents, until you come across path n. 641 to "Lach de Lauscel" (Lagusel Lake). Turn left and cross the stream "Ruf de Sèn Nicolò" walking on the comfortable gangway above it and enter the wood. The path continues descending to an alluvial stony ground and then crossing the bed of the stream "Giaf". Make your way now to the dirt road of the last stretch of Val San Nicolò. Going down to Baita Ciampié (1.826 m) you will reach the paved street to Saùch car park (2,15 h).

Did you know that...

The "toal del Mason", natural line of detachment of landslides and debris accumulation, is located in the area of San Pellegrino. Here, there was a deposit of "blue calcite vesuvianite" that is now extinguished, unfortunately, due to excavations conducted senselessly. In 2000, anyway, some geologists found, also here, a stretch of still intact mineralization and from here several geodes containing crystals up to 30 mm long were extracted. This mineralization has been associated to the "fassaite" variety, a contact mineral that generated from the physical-chemical changes that were caused from the upwelling of magma in limestone.

Initiatives reserved to the guests with the Val di Fassa Card (ask your hotel/apartment). Enrolments required within the previous day by the Tourist Offices. The activities are reserved to the guests of the associated structures of Val di Fassa Tourist Board.
