

GOOD MORNING VAL DI FASSA

Suggestions and tips for your holiday. Edited by Apt Val di Fassa

08/30/2018

Penia di Canazei (1555 metres) is located at the foot of the Marmolada and just below the first hairpin turns that bring to Fedaia Pass.

HIGHLIGHT

NIGHT WALK IN THE HEART OF PENIA

Take a soirée at the end of August, a fairytale village, a square enclosed between ancient houses and a fountain with limpid water, add delicious flavours and aromas, some folk music and here you are "Tel Cher de Penia" (In the heart of Penia). The event takes place today from 8.30 p.m., in this village that has remained authentic, were it is possible to perceive the structure of ancient dolomitic suburbs, when the economy was based on mountain agriculture and cattle breeding. Do not miss, so, the occasion of a walk through the narrow roads and the square where it is possible to taste some delicacies of the local cuisine, see some artisan at work and have fun with some traditional melodies.

Itineraries

FROM SORAGA TO BARBIDE TO THE CENTRE OF TAMION

From the centre of Soraga, take the street Strada del Ciocch and reach the neighbourhood of Barbida along the namesake street. One reached the church, take the narrow street on the right, pass below and archway and go to the left towards the mountain. Go straight and then to the right, ascending through woods and meadows to reach a plain, in a wood of larches and spruces. There, a small hill on the left is ideal to admire the beautiful sight over Soraga, Moena and Tamion, situated up in the middle of the meadows. Go on straight ahead and then along some bends that lead to a slope with centennial larches. After an ancient hayloft, burnt by the sun, enter the hamlet of Tamion. Here you will meet two fountains before reaching the centre of the suburb. Go back along the same track.

The complete schedule of the events is available by the tourist offices of the valley.

Did you know that...

At the beginning of the XX Century, the peasants in Val di Fassa had quite a poor knowledge about artificial fertilizer, they would use (and not always) the classic manure. They were afraid that any new habit, modern and not so trustable, could cause illnesses to the cattle, their most precious good that needed to be protected. The muck, usually, would be brought with the sledges in winter, on the fields covered in snow, where it would often get icy and then, in summer, it would be scattered with the pitchforks. Its main goal was to fatten pastures and meadows, rather than fields.

Initiatives reserved to the guests with the Val di Fassa Card (ask your hotel/apartment). Enrolments required within the previous day by the Tourist Offices. The activities are reserved to the guests of the associated structures of Val di Fassa Tourist Board.
