Many characters of the "Grop" wear the "faceres", traditional wooden masks.

HIGHLIGHT

PUT THE MASK ON FOR THE FOLK FEAST

The folk group "El Grop de la Mescrès de Cianacei e Gries" presents today a preview of the winter season and of a Carnival with unusual characters and rites that differ from the whole alpine arch. The group organizes a folk feast in the yard beside the roundabout in the street Strèda de Pareda. Folk music, traditional dishes and the masks' dances, in particular those of the Marascons to the rhythms of the "bronsins" (bells bonded to big belts), are the leitmotif of the feast. The group was born several years ago and was up until the Sixties, when it was dismissed for several reasons. In 1997 it was reconstituted and, since then, it animates several events during Carnival as well as during summer.

Itineraries

FROM MOENA TO SAN PELLEGRINO TO RIFUGIO FUCIADÉ

The state street n. 346 connects the town of Moena to San Pellegrino Pass (1.919 m). Descend for 200 metres on the other side of the mountain Pass and after an overpass, turn left into the road ascending towards Hotel Miralago and leave your car. You can also park in the broad parking area on your right, before the overpass. From Hotel Miralago, an mostly flat and easy dirt road starts, leading you to the beautiful hollow of Fuciade, an extraordinary limestone amphitheatre surrounded by majestic mountains, whose Ladin names are L'Om, Jigolè, Sas de Valfreida. The place is also particularly interesting from a botanic point of view, due to the presence of many plants and flowers, some of which are one-of-a-kind. The itinerary ends at Rifugio Fuciade (1.972 m; 1 h). Go back along the same route.

Did you know that...

The fountain ("festil" in Ladin) that is commonly set in the squares of the villages as well in the widenings located along the flow of the streams of Fassa is generally made of stone or of conglomerated concrete. The biggest fountains are normally mirrored with washtub and drinking trough, but sometimes monolithic in stone. Once upon a time it was a habit to cover the washtubs with wood, to protect the women in case of bad weather. On the other hand, the fountains made completely in wood, a material that is not so diffused elsewhere, have disappeared by now.
