## HIGHLIGHT

### "ROCK & STARS" ON SASS PORDOI

Within the most indicated period of the year to admire the shooting stars, let's go up to the 2950 metres of Sass Pordoi tonight, to observe the stars, from 8.30 p.m. This is a unique (and easy to reach) location for an astronomical insight, with even the telescopes, together with Claudio Balella, aeronautic astronomy and frontiers science expert communicator. An appointment for those who are passionate of the stars, but also a perfect rendez-vous for hopeless romantics. During the evening, in memory of the 50th anniversary of the moon landing, Balella will also make a report with pictures about "The first man on the moon and the Apollo 11's mysteries". (Enrolment: by the cash desks of the lifts in Canazei, Campitello and Sass Pordoi).
